

## **My experience in Germany**

Two months have passed after I came back to China. When my friends asked me how you felt after this exchange program. It's really hard to express my feeling by words. I find a new world where everything is different. I like Germany including good weather, beautiful scenery and kind person.

### **The German Class**

It's a very good opportunity to study German in the afternoon class. I needed to attend the class from Monday to Thursday at 18:00-20:00. Through this class I can touch German culture which is very amazing to me. Our teacher is very funny and patient. At the beginning of every class, we needed to answer and asked other students some questions to practice it. After the final exam the teacher said we all passed it and would be taught no longer by him because we went up and up. We took a picture together and I found at last I felt in love with this class.

### **The international office**

Mrs. Brebeck is a kind woman who gives me many help during my stay in Germany. After I arrived in Paderborn, my buddy called Julia picked me up in the train station. She is a very enthusiasm girl. I couldn't get used to the new life so quickly without her help. The international office organized many trips to other cities in Germany such as Berlin, Hamburg and so on. It gave us exchange students many opportunities to make friends and communicate.

### **The Get Lab**

I had two classes taught by Get lab and that are Robotic and Digital Image Processing which are all professional classes. I chose Digital Image Processing as my interest when Prof. Mertsching asked me. She gave everyone a supervisor to guide us. My supervisor is Mahmoud. He gave me many help. Although I just learned some basic

knowledge because I didn't have the foundation, this experience introduced me to the field of digital image processing.

## **Travel in Germany**

I traveled to Berlin and Hamburg together with other exchange students. The trips are all organized by the international office. It's very cheap with the view that we are all students. Berlin has a long history where the buildings are very magnificent. The Brandenburg Gate gave me a deep expression and it's a symbol of Berlin. In my memory Hamburg is a romantic city and there is big lake including two parts in the center of the city. You can find many swans in the lake and it's very funny to feed them.

## **Life in Paderborn**

Paderborn is a small town where the weather is changeable. There are many rains during my stay but my India friends said rainy is good weather. It's so strange. The summer is very hot and short. I started a new life such as how to buy something in the supermarket with different language, how to take bus with a time-table and so on. There are many stories in this small town and if I have another chance to go to Germany I will come back to Paderborn again. Germany won the world cup game in 2014. It's a special opportunity for me to feel the method to celebrate the tournament.

## **Acknowledgements**

First and foremost, I would like to give my sincerely thank to Prof. Mertsching who guided me in the class of Robotics. Second, I also would like to acknowledge Mr Tobias who answered my questions many times before I went to Germany and helped me settle problems during my stay. Furthermore, none of this would have been possible without the help of DAAD and Prof. Yuanmei, I would like to express my heartfelt gratitude to them.
